

Kirill Rogovoy

Looking for a talent, aren't ya?

[Back to the Main page](#)

— Summary —

Straight to the point, right? I'm a (web) software engineer, who spent the last 4 years architecting complex information systems at scale, developing lots of tools and features, mentoring old colleagues, interviewing new ones and learning tons about [how the internet works](#).

Programming is my biggest passion (though not the only one) at the moment and I'm kinda on a mission of getting to the top in software development.

I have decent front-end skills with the vanilla browser stack and React. I feel very confident writing Javascript, Golang, Bash or PHP on the back end, but will be happy to learn what fits your team the best. I'm also very DevOps-spirited and love automating as many internal processes as possible. And I'm a [heavy user of containers](#).

I'm a technology agnostic and always look for the best tool for the job. Have no emotional bonds to programming languages (though Golang rocks!).

— Personal highlights —

- Always striving to see the big picture and act in the best interest of the business.
- Made a few interesting Open Source projects such as:
 - [GitHub - kirillrogovoy/promised-pipe](#)
 - [GitHub - kirillrogovoy/pullkee](#)
 - [GitHub - kirillrogovoy/konfig](#)
 - see more on <https://github.com/kirillrogovoy>
- Contributed to other Open Source projects such as:
 - [GitHub - less/less.js](#)
 - [GitHub - johntitus/node-horseman](#)
 - [GitHub - reindexio/youmightnotneedunderscore](#)
- An active member of the best programming forum on Earth - [Fun Fun Forum](#)
- Very much aware of technical debt and do my best to keep it low.
- Got stickers on the laptop, so it's clear I know what I do!
- Got the "treat people how you want to be treated" attitude.
- Value simplicity the most.
- Constantly trying to add some organizational and cultural value as well.
- Not good at composing CVs.

— Work Experience —

Each company I've worked with was an amazing experience and a unique journey. I'm very grateful for every opportunity I had!

Velvica, Senior Software Engineer / Architect

August 2014 - now

General responsibilities:

- Application development and architecting (at all stages).
- Product development.
- New development practices integration and creating of internal tools.

- Fighting for time to deal with technical debt.
- Technical interviews.

Visited VMWorld 2015 in Barcelona.

LightSoft, Full Stack Web Developer

May 2014 - July 2014

General responsibilities:

- Developing both front and back ends of a number touristic web apps.
- Product development.

Participated in creating a new version of <http://hotelsbroker.com>.

IT Ledo, Junior Web Developer

May 2013 - May 2014

First job in the industry. Improved some existing products as an outsourcer. Also, made some private applications from scratch. Learned much about doing software engineering right.

Had the best mentor I've ever met!
