— Summary —

I'm a web software engineer, who spent the last 4 years architecting complex information systems at scale, developing lots of tools and features, mentoring old colleagues, interviewing new, and learning tons about how the internet works.

Programming is my biggest passion (though not the only one) at the moment and I'm kind of on a mission of getting to the top in software engineering.

I feel very confident writing Javascript, Golang, Bash or PHP on the back end and I'm always happy to learn whatever fits my team the best. I'm also very DevOps-spirited and love automating internal processes as much as possible. And I'm a heavy user of containers. I have solid front-end skills with the vanilla browser stack and React.

I'm a technology agnostic and always look for the best tool for the job. And I care a lot about what I do.

— Personal highlights —

- Always strive to see the big picture and act in the best interest of the business.
- Made a few interesting Open Source projects such as:
    - GitHub - kirillrogovoy/promised-pipe
    - GitHub - kirillrogovoy/pullkee
    - GitHub - kirillrogovoy/konfig
    - see more on https://github.com/kirillrogovoy
- Contributed to other Open Source projects such as:
    - GitHub - less/less.js
    - GitHub - johntitus/node-horseman
    - GitHub - reindexio/youmightnotneedunderscore
- An active member of a professional programming forum - Fun Fun Forum
- Put eliminating technical debt the top priority.

- Got stickers on the laptop, so it's clear I know what I do!
- Got the "treat people how you want to be treated" attitude.
- Value simplicity the most.
- Constantly trying to add some organizational and cultural value as well.

— Technologies and concepts I'm great at —

- Languages: Bash, Golang, Javascript (including NodeJS), a bit of Python, PHP, HTML, CSS (and LESS), Markdown
- Frameworks: Express, React, Symfony
- Databases: PostgeSQL, MySQL, Mongo, Redis
- DevOps: CI services, Docker, Docker Swarm, Service-oriented architecture
- Development: Testing, TDD, Git, Github, Shell, Profiling
- Protocols: TCP and TLS, HTTP, SSH, FTP, SMTP, IMAP, Postgres, REST, GraphQL

This list is constantly growing.

— Work Experience —

Each company I've worked with was an amazing experience and a unique journey. I'm very grateful for every opportunity I had!

Senior Software Engineer / Architect at Velvica

August 2014 - now

General responsibilities:

- Application development and architecting (at all stages).
- Product development.
- New development practices integration and creating of internal tools.
- Fighting for time to deal with technical debt.
- Technical interviews.

Visited VMWorld 2015 in Barcelona.

Full Stack Web Developer at LightSoft

May 2014 - July 2014

General responsibilities:

- Developing both front and back ends of a number touristic web apps.
- Product development.

Participated in creating a new version of http://hotelsbroker.com.

Junior Web Developer at IT Ledo

May 2013 - May 2014

First job in the industry. Improved some existing products as an outsourcer. Also, made some private applications from scratch. Learned much about doing software engineering right.

Had the best mentor I've ever met!

— Education —

Zaporizhzhya Electro-Technical Collage
Computer Science
2010 - 2014
